# Keto-100 KARATE H

An excellent general harvester head for thinning, selective cutting and small regeneration felling.

The large opening of the delimiting knives and the five-row tracks ease the production and harvesting of fuelwood.

The rear knife and rigid saw housing ensure successful felling. Even larger trunks remain securely in the harvester head, and the positioning for sawing is accurate in a Keto-typical manner.

The strong two-cylinder tilt allows the handling of even larger trees in an upright position. The fully rotating rotator revolutionises the usability of the harvester head. With patented hydraulics output and return, as well as electricity passthrough.

## Technical data

Height in felling position	1305 mm
Height in processing position	1950 mm (with rotator)
Width in open position	1320 mm
Width in closed position	1020 mm
Length in processing position	1305 mm
Depth in felling position	1220 mm
Weight	820 kg (with rotator)
Felling diameter	470 mm
Delimiting diameter	400 mm
Delimiting knives	4
Maximum working pressure	250 bar
Recommended pump capacity	190 l/min
Saw bar length	22"
Feeder type	5-line track
Feed force	21 kN
Maximum tree weight	1300 kg
Maximum feed speed	4,9 m/s
Engine power of base machine	90 kW
